## CARING FOR YOUR SAVAGE HAND PAINTED CANVAS BACKGROUND

Savage Canvas backgrounds are made from 100% superior cotton fabric and are hand painted with an acrylic-based paint. They are not flame retardant. Care should also be taken not to get the background wet. We recommend spraying the background lightly with a fabric protection spray. Wait until the first coat is entirely dry and then spray again. Allow the background to dry thoroughly before using or storing.

Use a steamer on the backside of the backdrop to release any wrinkles or creases in the material. Do not hold the steamer on one spot for too long.
